

Track 2 Task Testing and Final Submission Timeline

1. Development and Testing Phase (2026.05.18 - 2026.06.25):

This phase is designed to help participants better understand the tasks and conduct targeted analysis, development, or training based on the results. During this phase, we will provide 736 tasks across four different scenarios as test cases for initial development. We will also open access to video download links, sandbox environments, ground truth for core tool calls and corresponding evaluation code, code usage instructions, and interaction flow examples. All the above information will be updated on **May 18** at

<https://github.com/ego-link/egolink2026/blob/main/code/track2/>.

PS: Track 2 is an interactive task. The provided sandbox environment includes a simulated user. This simulated user is implemented using a multi-agent framework. The LLM driving this framework needs to be deployed by participants either through open-source models or official API calls. The performance of simulated users driven by different model sizes will also be announced on May 18 for participants to evaluate and use. (Models available for evaluation include: Qwen3.5-397B-A17B, Qwen3-235B-A22B-Instruct-2507-Pro, Qwen3.5-122B-A10B, Qwen3.5-35B-A3B, Qwen3.6-35B-A3B. Participants may deploy these in advance based on their own circumstances.)

2. Final Evaluation Submission Phase (2026.06.18 - 2026.06.25):

We will provide 100 tasks different from the development and testing phase as the final evaluation tasks. Similarly, we will open access to video download links, interaction code, and sandbox environments for these tasks. However, in this phase, we will no longer provide the ground truth for core tool calls. All the above information will be updated on **June 18** at

<https://github.com/ego-link/egolink2026/blob/main/code/track2/>.

Participants should preserve the interaction history for each task (i.e., the complete conversation/tool call records within an episode of the task) as the data for final evaluation. The final submission format will be announced before June 18.

Each participating team has only one submission opportunity. The latest submission deadline is 2026.06.25 (AOE).

Track2 任务测试与最终提交节点

1 开发测试阶段（2026.05.18–2026.06.25）：

该阶段是为帮助参赛者更好的了解题目，并针对问题结果进行针对性分析，开发或训练。在这个阶段，针对四个不同的场景，我们会给出 736 个任务作为前期开发的测试用例。同时，我们会开放这些任务对应的视频下载链接，沙箱环境，核心工具调用的真值和对应的评测代码，代码使用说明，交互流程示例等。以上信息将会在 **5 月 18 日** 更新在 <https://github.com/ego-link/egolink2026/blob/main/code/track2/> 目录下。

PS：track 2 为交互式任务，提供的沙箱环境中包含 simulated user。改 simulated user 采用 multi-agent 框架实现，驱动 simulated user 这个框架的 LLM 需要参赛者自己部署开源模型或调用官方 API，不同尺寸模型驱动的 simulated user 的性能将会在 5 月 18 日一同公布，供参赛者进行评估与使用。（参评模型包括：Qwen3.5-397B-A17B，Qwen3-235B-A22B-Instruct-2507-Pro，Qwen3.5-122B-A10B，Qwen3.5-35B-A3B，Qwen3.6-35B-A3B。参赛者可根据自身情况提前部署。）

2 最终评测提交阶段（2026.06.18–2026.06.25）：

我们会给出与开发测试阶段不同的 100 个任务作为最终评测任务。同样的，我们会开放这些任务对应的视频下载链接，交互代码，沙箱环境。但该阶段，我们不再提供核心工具调用的真值。以上信息将会在 **6 月 18 日** 更新在 <https://github.com/ego-link/egolink2026/blob/main/code/track2/> 目录下。

请参赛者保存好每个任务的交互历史（即这个任务在一个 episode 中完整的对话/工具调用记录），作为最终参与评测的数据。数据的最终提交格式，将于 6 月 18 日前公布。

每个参赛队伍只有一次数据提交机会，最晚提交时间为 2026.06.25（AOE）。
